AP-20 Air Sampling Pump Kit

SGD-BK-CGA Compressed Breathing Air Sampling Kit

AS-1 Air Flow Indicator determines the velocity and direction of air flow.

SA-10-AP20
One Hand Operation Switch

B-191 Tube Tip Cutter

HOW TO ORDER

P/N	Description
AP-20	Aspirating pump with carrying case, two rubber tube connectors, a container of lubricant, and an instructions sheet.
SGD-BK-346	Consists of a pressure regulator-flowmeter with CGA 346 cylinder connection, the specially calibrated flowmeter that provides ease of measuring carbon monoxide, carbon dioxide, oil mist, oxygen, and water vapor, an adjustable wrench, a timer, a tube tip cutter, and instruction manual. Note: Detector tubes are not included and must be ordered separately.
SGD-BK-590	Consists of a pressure regulator-flowmeter with CGA 590 cylinder connection, the specially calibrated flowmeter that provides ease of measuring carbon monoxide, carbon dioxide, oil mist, oxygen, and water vapor, an adjustable wrench, a timer, a tube tip cutter, and instruction manual. Note: Detector tubes are not included and must be ordered separately.
SGD-BK-P4M	Consists of a pressure regulator-flowmeter with 1/4" NPT male inlet connection, the specially calibrated flowmeter that provides ease of measuring carbon monoxide, carbon dioxide, oil mist, oxygen, and water vapor, an adjustable wrench, a timer, a tube tip cutter, and instruction manual. Note: Detector tubes are not included and must be ordered separately.
SGD-BK-SCUBA	Consists of a pressure regulator-flowmeter with a standard scuba yoke connection with a bleeder valve, the specially calibrated flowmeter that provides ease of measuring carbon monoxide, carbon dioxide, oil mist, oxygen, and water vapor, an adjustable wrench, a timer, a tube tip cutter, and instruction manual. Note: Detector tubes are not included and must be ordered separately.
AS-1	Air flow indicator kit. Spot test system to determine the direction of air flow. Kit consists of aspirating bulb, carrying case and one box of No. 300 tubes.
SA-10	One-hand operation switch. This device is useful for sampling on a ladder or narrow spaces where two-hand operation of the pump is not practical.
B-191	Tube tip cutter – provides a safer means of removing tube tips. Pieces do not scatter and are accumulated in the container body.
